

First Announcement

The 17th Baikal International Triennial School-Seminar “Methods of Optimization and Their Applications” will be held on July 31 – August 6, 2017 in the Maksimikha Bay, Buryatia

- *Energy Systems Institute of Siberian Branch of the Russian Academy of Sciences*
- *Laboratory of Algorithms and Technologies for Networks Analysis, Higher School of Economics, National Research University, Nizhny Novgorod*
- *Novosibirsk State University*

Website of the workshop: <http://isem.irk.ru/conferences/mopt2017/en/index.html>

The School-Seminar offers the plenary lectures by leading experts in theory and methods for optimization and applications of the optimization methods, as well as the talks in the following sections:

- *Discrete optimization*
- *Continuous optimization*
- *Optimal control*
- *Optimization in inverse problems*
- *Equilibrium and bi-level programming*
- *Applications of optimization methods in energy problems*

The School-Seminar will be held in the tourist camp “Kumutkan”, Buryatia.

Special issues of

- *Journal of Global Optimization*
- *Optimization Methods and Software*

will to be devoted to the School-Seminar.

Information about deadlines is available on the conference website.

A workshop for young scientists will be held within the School-Seminar.

We hope that the events will be fruitful for all participants.

We wish you all success!

Looking forward to seeing you!

Organizing Committee
